

At our Microsoft SharePoint Practice we develop following types of applications based on SharePoint 2007 | 2010

- Business Connectivity Services
- InfoPath Form Services
- External Lists
- Workflow
- SharePoint Designer
- Visual Studio
- API Enhancements
- REST/ATOM/RSS

- PerformancePoint Services
- Excel Services
- Chart Web Part
- Visio Services
- Web Analytics
- SQL Server Integration
- Power Pivot

- Ribbon UI
- SharePoint Workspace
- SharePoint Mobile
- Office Client
- Office Web App Integration
- Standards Support

- Tagging, Tag Cloud, Ratings
- Social Bookmarking
- Blogs and Wikis
- My Sites
- Activity Feeds
- Profiles and Expertise
- Org Browser

- Enterprise Content Types
- Metadata and Navigation
- Document Sets
- Multi-stage Disposition
- Audio and Video Content Types
- Remote Blob Storage
- List Enhancements

- Social Relevance
- Phonetic Search
- Navigation
- FAST Integration
- Enhanced Pipeline

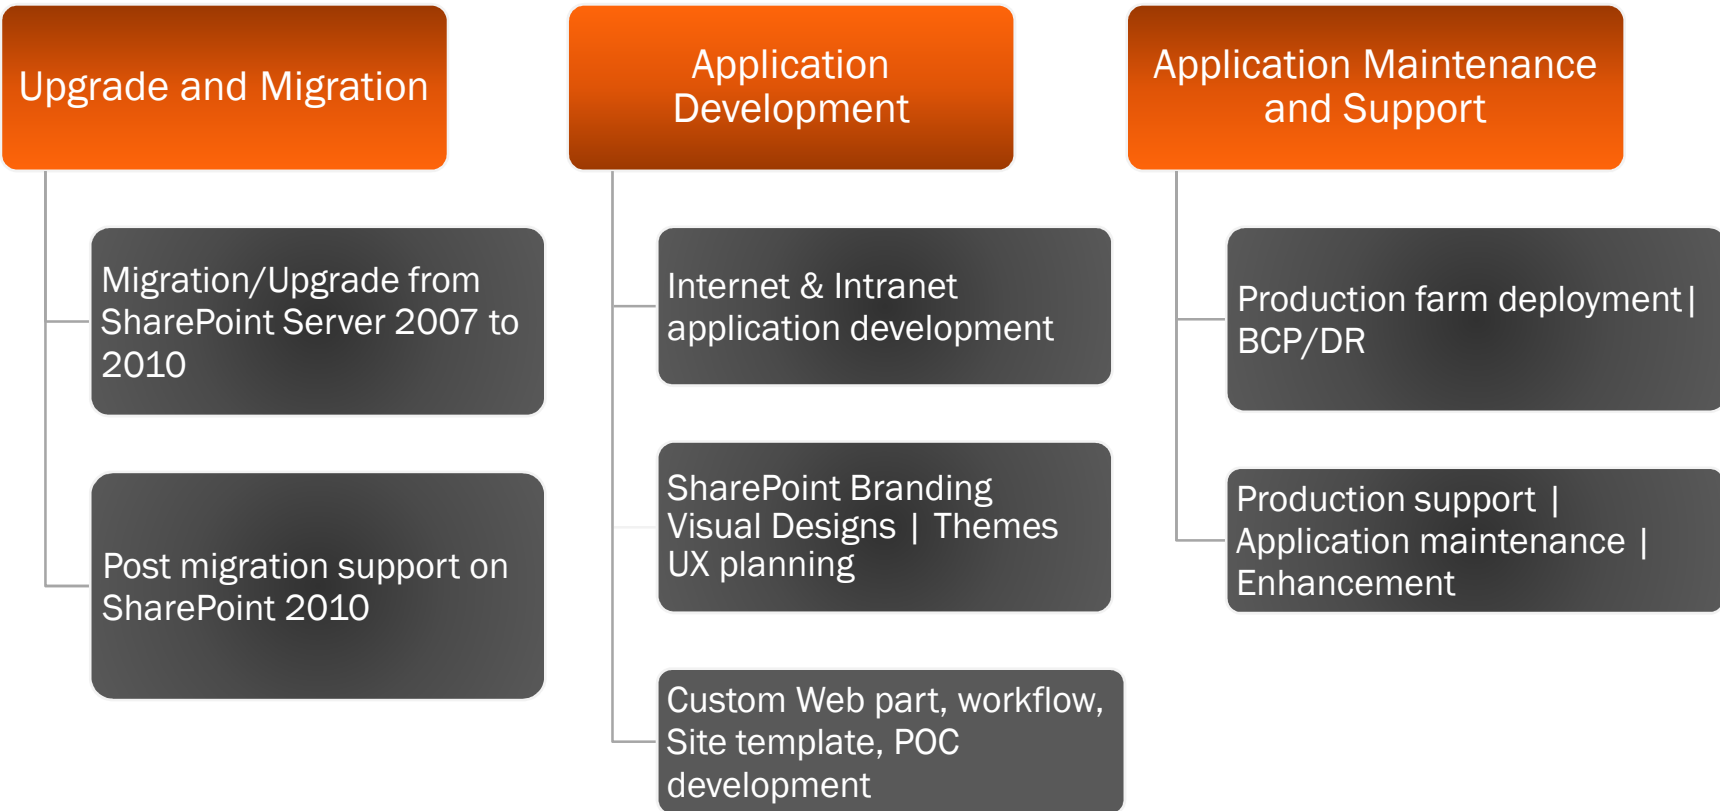

necessity for SharePoint implementation in your organization

If you wish to have

- easy-controllable-configurable-editable products or service marketing on web
- increase in operational efficiency
- reduced time to search assets
 - Group search results as per keywords / tags / areas/ departments etc.
- effective enterprise collaboration amongst team for idea generation or delivery time and cost optimization
- retain and maintain enterprise knowledge, process and business proposals in secure but still need to ensure their available easily in a central repository
- automated business processes
- reduced time to make decisions with accurate facts and figures
- Integrate many applications using few web pages in your site by following simple configuration
- segregate and still collaborate between different teams on web across geographies
- business information pushed to highly mobile teams in secure way

+ many more features

umbrella of services we offer (optional)

We also have enterprise mobility practice and as a part of that we are working on enabling /creating/service mobile applications interacting with SharePoint on

Windows Phone 7 | Google Android | Apple iOS | Blackberry

web application development (internet) services

We develop Internet facing websites leveraging

- Web content management
- Digital asset management
- Branding – User eXperience and visuals design
- Knowledge management to educate customers
- Custom web parts and workflow development
 - extending OOB features
 - Developing depending on requirement\business objectives
- We are capable of
 - Enabling existing applications with **multi-lingual interface**
 - **Enabling existing SharePoint applications with Search**

custom development (intranet) services

We develop Corporate Intranet portals on

- WSS 3.0 | WSF | MOSS 2007 | SharePoint Server 2010 leveraging
 - Collaboration
 - Social Computing
 - My site (Personalization)
 - Business Intelligence
 - Business Process Automation
 - Project Management
 - Knowledge Management
 - Departmental Sites(IT Department\HR Department etc.)
 - Custom Site template\ Web part Development (OOB\Custom depending on requirement\business objectives)
 - Enterprise Search
 - LOB Integration

RIA enabled Intra/Internet portal development/enhancement services

- SharePoint default User Interface may hamper users interest to collaborate as it is formal and UX is missing. Hence, enabling it with RIA is the right choice!
- If the Internet portal is not able to fetch targeted audience/customers; the number of clicks on products or service page are low or if the existing SharePoint branding (look and feel) is eating up your creativity and simplicity while presenting your products and services

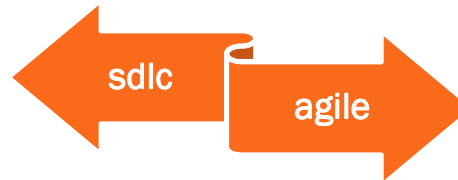

We will enhance your existing solution – OR – will create new portal which will leverage

- UCD (User centered design)
- Visual design options
- Integration of RIA platforms like Silverlight | Flash | JQuery | HTML 5 (learning curve involved)
- Personalization like iGoogle
- Rich data visualization
- Digital branding
- Digital asset management
- Custom search visualization

production support & consulting services

- SharePoint Remote Administrative Services - VPN
- Issue and bug fixing
- Impact Analysis and Consulting
- Alternative solution proposition
- Functional testing

tools and methodology

Project Management

Microsoft Project
TFS (Team portal, collaboration and task management)

Design

SharePoint Designer(2007\2010)

Visual Design Variation 1

Visual Design Variation 2

The website features a dark brown background with a central image of a smiling man in a white shirt and red tie holding coffee and pastries, standing on a bed of coffee beans. To his right is a large cup of coffee. The top navigation bar includes a logo, contact information (TOLL FREE: 1-800-387-9398, EMAIL: info@... .com), and a search bar. Below the navigation is a horizontal menu with categories: OIL STORY, FROM FIELD TO CUP, FOOD SERVICE SOLUTIONS, and RETAIL SOLUTIONS. The main content area is divided into several sections: a featured article titled 'I TAKE 100 COFFEE BREAKS A DAY. Do You?' with a 'More Field to Cup Story' button; a sidebar with circular icons for 'Mortue-Paters Blend', 'Coffee Breaks', 'Test of Heart', and 'Tea Breaks'; a 'We Serve Retail' section with links for Restaurants, Hotels/Lodging, & Catering, Office-Coffee Service, Healthcare, and Gas & Convenience; a 'We Serve Food Service' section with links for Coffee Brand, Coffee Packaging, Coffee Format, Tea Brand, Tea Packaging, and Tea Format; a 'What's New...' section with placeholder text and 'Read more >>' links; an 'Our Pick' section with 'Pail Recommendations' and 'Mug Recommendations' featuring product images and placeholder text; and a 'Visit Our Brand Sites' section with four small thumbnail images of brand packaging. The footer contains 'Green | Privacy | Site Map | Contact' and 'Copyright ©2011 All rights reserved.'

Visual Design based on Metro design Principle

We migrated this site to SharePoint 2010

The screenshot displays the Yamana Portal intranet. At the top, there is a navigation bar with 'GOLD' branding and links for Home, Executive, Departments, People, Knowledge Management, and Gold Market. A search bar is also present. Below the navigation bar, a left-hand menu lists various departments and sites. The main content area features a large 'Welcome to the Yamana Portal!' heading. To the right of the welcome message are sections for 'Stocks' and 'Indices', both containing tables of market data. Further right, there are sections for 'Yamana Headlines' and 'Quick Links'. At the bottom right, a 'Weather Forecast' for Toronto, CA is shown, including current conditions and forecasts for Friday and Saturday. The browser's taskbar at the bottom indicates the system is in Protected Mode.
